

FastPlate™ Fixed

Automated License Plate Recognition System

Advanced Detection Technology's FastPlate™ Fixed License Plate Recognition Solution automatically captures and digitizes license plate numbers to validate driver and vehicle information, and immediately presents security personnel with data, images, and on-screen alerts.

When used in conjunction with Advanced Detection Technology's FastGate™ Access Control Solution, FastPlate™ offers details on authorized operators and stored video or images of the vehicle. It can also compare the license number to a stolen vehicle database, and automatically control gates or barriers.

Ideal for military staff, law enforcement professionals, and parking lot and garage security applications, the FastPlate™ Fixed License Plate Recognition System is available in multiple configurations including

- > > Inbound lane system including camera and lighting
- > > Inbound lane only or inbound and outbound lane including camera, lighting and desktop computer
- > > Inbound lane system including camera and lighting designed to operate in conjunction with LowCam™ Under-Vehicle Inspection Systems or Indoor or Outdoor Kiosk featuring desktop computer with sunlight-readable touchscreen
- > > Stand-alone system including desktop computer, license plate camera, scene camera and database

FASTPLATE™ FIXED FEATURES

- > > Dual cameras with 1/3" Exview HAD CCD
- > > Up to 25m focal distance
- > > Input Voltage – Factory Set: 12DC, 24VAC, 120VAC, 240VAC
- > > Weather tight housing, heated or cooled
- > > Long life infrared LED lighting
- > > Wavelength: 810, 850 or 950nm pulsed LED
- > > Integral mounting with camera
- > > Intel® Core™ 2 Duo Processor
- > > 80 to 240 GB hard drive
- > > 512 MB DRAM
- > > 17inch TFT LCD
- > > Up to 1280 x 1024 resolution 76Hz refresh
- > > 32 bit color
- > > 110/220 VAC or 12/24 VDC power requirements
- > > Computer and Monitor (optional)
Intel® Chipset and Core™ 2 Duo processor
512 Mb memory, 15inch TFT-LCD color,
up to 1280 x 1024
