

LowCam™ VI104

Under-Vehicle Inspection System

Advanced Detection Technology's LowCam™ VI104 Under-Vehicle Inspection System is a *permanent, fixed, in-road*, under-vehicle inspection system. The system uses a state-of-the-art, air knife debris removal system to ensure a clear view in adverse weather conditions such as heavy rainfall, strong winds, and dusty environments. The LowCam™ VI104 offers a slim design that causes no road obstruction.

LowCam™ VI104 is ideal for roadways that experience harsh weather conditions such as heavy rains, winds, or dust.

- > > Permanent, fixed installation with no road obstruction
- > > Debris cleaning system for clear images in all climates and weather conditions
- > > User-friendly, icon based software operates with simple 16-key keypad
- > > Easy-to-use system, operator has full control of video record and playback functions

LowCam™ VI104 offers a slim, in-ground design without forfeiting quality, detailed images of the entire vehicle's undercarriage. On-screen images can be captured in low or no-light settings and in all weather conditions. Advanced Detection Technology's LowCam™ VI104 utilizes an automatic vehicle sensor to detect undercarriage height and appropriate camera settings for the vehicle.

User-friendly controls allow the operator the ability to view the under-vehicle images in quad or linear formats as the vehicle passes over the eight camera system. Video streams are instantly available for review using forward, back, pause, speed control, and zoom functions.
