

# UME-36Pro

## Universal Memory Exchanger

### Overview

The UME-36Pro is a standalone mobile phone memory transfer and backup / restore solution, specifically designed for the needs of mobile operators, retailers and service centers. The UME-36Pro facilitates the transfer of internal phone and SIM content, including phonebook, SMS messages, images, videos, ringtones, audio and more .

The UME creates a new source for revenues, removes barriers to new phone sales, and eases the phone servicing process by providing a value-add service to subscribers at all retail and servicing Points Of Sale.

### At a Glance
