The CBRN EMSCompact Stretcher

The CBRN threat has become more and more relevant in the recent decade, showing the world how crucial it is - for both civilian and military teams - to be well equipped and prepared in order to respond quickly and safely to CBRN attacks, to ensure minimal casualties.

Shoshana-Metal Ltd. has designed and developed its state-of-the-art revolutionary CBRN EMSCompact Stretcher to meet the specific operational requirements of the CBRN threat:

Intensive worldwide market research has yielded the best chemical resistant mesh fabric suitable for a stretcher, whose advantages include a Superb Chemical Resistance for decontamination when exposed to body fluids, industrial chemicals, and CBRN warfare agents; Excellent Melting Point; and an Excellent Abrasion Resistance. We also made it a much stronger stretcher - a Weight Load Capacity of 350kg instead of 150kg, while the weight of the stretcher, though increased, is still only 5.5kg.

- Weighing only 5.0kg (11lbs)
- Folding into amazingly small 50cm (19.7in) in height
- Slips neatly into its matching backpack case
- Easily stored in facilities, vehicles and helicopters
- Easy to use - folding and extending it in approximately 7-10 seconds

Accessories

Straps

- A Standard set of 2 wide straps.
- A Standard set of 3 thin straps.
- A Unique feature - removable and adjustable straps.
- Additional straps according to our customers' preferences.

Backpacks

In addition to our standard backpacks, we provide tailor made solutions.
