

R-AID™ Bag

We know medics do more than hand out Band-Aids™ and the **R-AID™ Bag** was designed for the fighting medic. Its compact design is perfect for those serving the dual role of Assaulter/Medic. The R-AID™ bag can be worn as a backpack, slung over a shoulder, or attached to your pack with FASTEK buckles. Bulk was kept to a minimum, but the bag is still large enough to carry what you need for 'on target care' or a lengthy patrol in a highly organized package.

The shoulder strap options allow you to put the bag on quickly when you are in full kit and make it easier to work from when treating on the move. Everything you need to treat a patient is within reach without removing the bag from your body.

If you're looking for a functional bag that won't add 50 lbs to an already heavy load, you just found it.

Color: Tan

CCP Marking Kit

The Tactical Medical Solutions **CCP Marking Kit** provides the essential components for marking either priority staging areas in a CCP or to mark an individual casualty in daylight or low light situations. It also includes a day and night marker for the control point and basic casualty tracking. Low intensity chem-lights provide enough light signature to aid in organization and the evacuation process without acting as a target indicator in non-permissive environments.

Part Number : CCP-K
